

PLATFORM OVERVIEW · 2026

A clearer way to find and offer homes in Lagos.

LagosRentHelp connects renters with verified property owners through focused discovery, private matching and a human-centred trust process.

What LagosRentHelp solves

Finding a home in Lagos can involve scattered information, unclear ownership and wasted inspections. LagosRentHelp organises the journey in one platform—helping renters discover relevant homes while requiring landlords to establish identity and ownership before they can publish listings.

The result is a marketplace designed around clearer information, responsible access and better-informed rental decisions.

Built on three practical principles

01

Trust before visibility

Identity and ownership evidence are reviewed before a landlord can publish.

02

Built around Lagos

Search and onboarding reflect Lagos LGAs and real local rental needs.

03

Privacy by design

Renter preferences improve matching without becoming public profile data.

How landlord verification works

1. Identity check

NIN verification and a clear personal photograph.

2. Ownership evidence

Property address, Lagos LGA and supporting title document.

3. Human review

An administrator checks identity against ownership details.

4. Approved access

Verified landlords can create and manage listings.

Confidence starts before a listing goes live. LagosRentHelp combines secure information collection with a human approval decision.

CORE PLATFORM FEATURES

Designed for every side of the rental journey.

From first search to ongoing property management, each feature helps people move with more clarity and control.

For renters

- ✓ **Lagos-focused search**
Filter homes by LGA, property type, price range and rental duration.
- ✓ **Personalised matching**
Rank approved homes using budget, location, timing, household and rental needs.
- ✓ **Saved favourites**
Keep promising homes together for easier comparison and follow-up.
- ✓ **Clear property details**
Review pricing, amenities, photographs and owner contact information before inspection.

For landlords

- ✓ **Guided onboarding**
Submit profile, identity, location and ownership details through a clear workflow.
- ✓ **Secure verification**
Identity images and ownership documents remain private during review.
- ✓ **Listing workspace**
Create, edit and manage property listings after verification approval.
- ✓ **Performance visibility**
Track listing availability, views, engagement and renter leads.

Professional oversight behind the experience

Verification control

Administrators review identity and ownership applications with clear approval states.

Portfolio insight

Super administrators can review landlords, listing totals and engagement indicators.

Account security

Email verification, password recovery and role-based access protect the experience.

Private matching, not public profiling

Renter preferences—including budget, income band, household size, pets and move-in timing—support recommendations without being displayed publicly or exposed to landlords.

Find with confidence. List with credibility.
